+Helpful Information

Hepatitis B

- Nursing students in need of the Hepatitis B vaccine series may choose to use Marian University Student Health Center (if registered in courses at Marian) for this highly recommended vaccination (3 injections, $80 each (**subject to change due to manufacturer pricing**).
- If you do not have medical documentation of the series, but are sure you have had it an option is to have the Hep B titre drawn, for an additional $33 (price subject to change). If the Hep B titre shows you are not immune then you will need to start the Hep B series.

Tetanus vaccine

- T dap vaccine is available at the Marian University Student Health Center ($60) (**subject to change due to manufacturer pricing**). If you have had the Tdap vaccine with in the last 10 years you are covered.

PPD

- The required TB test ($10) can be placed at the Marian University Student Health Center as well: It must be read/interpreted 48-72 hours later (no test on Thursday due to Sat/Sun read).

The Marion County Health Dept. is another option for all of your immunizations.

Physical: Marian University Student Health Center can provide the necessary physical at no charge for students registered at Marian—please call to schedule an appointment as availability will be limited. To make an appointment with the Marian University Student Health Center please call: (317) 955-6154

Rubeola, Rubella and Varicella Titres: Lab test results are mandatory for students to prove you are immune to both kinds of measles; Rubella and Rubeola, and Varicella (chicken pox). ***Vaccines alone do not meet this requirement.*** Your proof of immunity is confirmed by checking IgG titres. You must provide the School of Nursing with a copy of the lab results. If previously pregnant, your obstetrician may have a Rubella Titre test result from your initial blood work. In that case, you should obtain a copy of that titre, and then you only need to have the Rubeola and the Varicella drawn.

We recommend that you obtain your titres at one of the following locations. You do NOT need an appointment. Your results will be faxed to the Marian University Student Health center on campus. It is responsibility to pick up the results and include them in your application packet.

Madison Avenue Medical Laboratory
8523 Madison Avenue; (317) 887-6407

- Subject to change: Rubeola $38, Rubella $16, Varicella $55

Summit Occupational Medicine
3750 N. Meridian St. Suite 300 (317) 631-0420

- Subject to Change: Rubeola $30, Rubella $30, Varicella $40

Please schedule an appointment if you need a health care provider to sign the immunization form; Marian University Student Health Center (955-6154)

The Marian University Student Health Center does not send results to the School of Nursing
